SUMMARY

I graduated from Istanbul Technical University (ITU) Computer Engineering in 1993. I did my master's degree in the same department between 94-98. Throughout my 30 years career I have developed my expertise in software development, infrastructure technologies and project management. I have accomplished many successful projects by working as both an expert and manager in companies in different sectors. I have successfully managed and completed many projects in the field of project management, which I have been active in the last 15 years of my career. I earned the project management PMP certificate in 2009, the ITIL expertise certificate in 2012, and the scrum master certificate in 2017. With different sector experiences, I have high business analysis skills, experience working in international companies and projects. I am willing to work in leadership positions in project management, IT software & operations teams in corporate companies, and I believe that I will be successful in these roles.
